Background

The Global Pulse Survey has been designed to be as simple and light as possible for microfinance institutions to fill out. Hence only a small core of questions is repeated in each wave, while the rest are spread out over different waves.

7. How badly would you say the microfinance sector in your country is struggling right now?

How will these data be used?

All data will be anonymized and permit only aggregate analysis (e.g., by country, region, or MFI size or type); data on any individual MFI will not be accessible. The data will be hosted at ATLAS, which is the leading data provider in the space and already hosts similar data on a secure, permissioned platform.

The data will be accessible to the public in interactive graphs, heatmaps, trend analysis, and other outputs that show the “real-time” state of the industry and how it is evolving for key metrics. Longer term, the data will be used for post-crisis analysis to understand the effectiveness of responses taken by MFIs and policy makers in different contexts.
Why should microfinance providers participate?

- Participating MFIs will get access to a deeper level of analysis with benchmarking against different averages, to help CEOs understand how their business is doing compared to peers.
- Understanding how the crisis is striking and evolving in different parts of the sector should dispel some of the uncertainty, helping CEOs know what to expect and plan accordingly.
- Giving funders and policy makers a comprehensive, updated picture of the crisis will enable quicker and better responses to distressed parts of the sector, which will benefit MFIs directly and indirectly.
